3M™ Aura™ 9300+ Disposable Respirators

Little Details
make a
Big Difference

The Power to Protect Your World™

Introducing the New 3M™ Aura™ 9300+ Series Disposable Respirators

3M make the respirators you need to wear to be protected. They also develop the respirators you want to wear. The brand new 3M™ Aura™ 9300+ Series disposable respirators are the result of 3M's continuous drive to improve comfort.

It is packed with ground-breaking ideas, technologies and materials, and has retained many of the features that helped make the 9300+ Series hugely popular.

With the aid of 3M's innovative new low breathing resistance filter technology, you can breathe through your respirator with even less effort.

The 3M™ Aura™ 9300+ Series also features an embossed top panel that helps reduce the fogging of eyewear from warm, moist exhaled air.

Breathing ease

NEW Low breathing resistance filter technology

- gives effective filter performance whilst lowering resistance to breathing resulting in improved comfort

3M™ Cool Flow™ Valve

- effectively removes heat build up to provide a cooler and more comfortable wear
- removes exhaled air and minimises the risk of fogging eyewear

Clear vision

NEW Embossed top panel

- helps reduce the fogging of eyewear

NEW Sculpted nose panel

- curved, low profile design conforms well to nose and facial contours
- helps provide a good field of vision
- improves compatibility with eyewear

Convenience

- flat-fold; easy to store when not in use
- hygienic individual packaging helps protect the respirator from contamination before use
- meets EN 149:2001+A1:2009 requirements

NEW Innovative chin tab

- improves ease of donning and adjustment to help achieve a comfortable fit

Face and head comfort

Design and material

- ingenious 3-Panel design fits a wide range of face shapes and sizes to accommodate your facial movements
- collapse resistant; ideal for work in hot humid environments
- stays securely in place, helping to provide a good, comfortable seal
- large soft nose foam material and smooth inner cover web both feel incredibly soft on the skin and help to create a comfortable environment for the face
- extremely lightweight

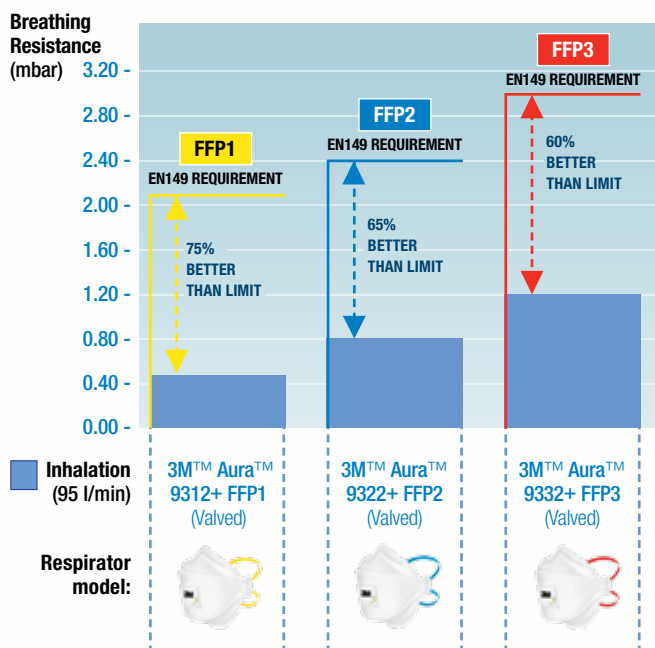

Breathe in more freely

The 3M™ Aura™ 9300+ Series respirators feature 3M's brand new low breathing resistance filter technology; an innovative filter media that helps minimise breathing resistance. This enables high filtering performance with less effort on the part of the wearer, making protection even less intrusive.

Chart (below): When tested to EN 149:2001+A1:2009, at a flow rate of 95 litres per minute, the approximate mean inhalation breathing resistance achieved with the new 3M™ Aura™ respirators was **75%** better than the maximum limit for a EN 149 FFP1 respirator, **65%** better for FFP2 and **60%** better for FFP3.

Making comfort up to 75% more breathable

Mean breathing resistance* of 3M™ Aura™ 9300+ Series Respirators as per requirements of EN 149:2001+A1:2009

Inhalation Breathing Resistance (95 l/min)			
Product	EN 149:2001+A1:2009 Requirement Limit (mbar)	Measured Mean (mbar)	Pooled Standard Deviation
9312+	FFP1 = 2.1	0.51	0.03
9322+	FFP2 = 2.4	0.82	0.06
9332+	FFP3 = 3.0	1.20	0.05

* Individual 95% Confidence Interval for Mean, based on Pooled Standard Deviation for inhalation. Inhalation flowrate at 95 l/min. Testing performed by BSI to the requirements of EN 149:2001+A1:2009 breathing resistance and is generally representative of performance.

Breathe out more clearly

The 3M™ Aura™ 9300+ Series respirators are designed to control air in such a way that it helps with another common issue with respirators: fogging eyewear.

- a** In an unvalved model: when exhaling, the embossed pattern reduces the airflow through the upper panel, the majority of the air exits through other panels. Less moist air reaches the surface of the eyewear from the top panel, helping to minimise fogging.
- b** In a valved model: when exhaling, the embossed pattern reduces the airflow through the upper panel, the majority of the air exits through the 3M™ Cool Flow™ Valve and other panels. Less moist air reaches the surface of the eyewear from the top panel, helping to minimise fogging.

3M™ Aura™ 9300+ Series Disposable Respirator Range: Key Industry Guide

FFP1 NR D - Protection factor: 4 x WEL* Unvalved		FFP2 NR D - Protection factor: 10 x WEL* Unvalved		FFP3 NR D - Protection factor: 20 x WEL* Valved	
					
3M™ Aura™ 9310+	3M™ Aura™ 9312+	3M™ Aura™ 9320+	3M™ Aura™ 9322+	3M™ Aura™ 9332+	
<ul style="list-style-type: none"> • Agriculture • Cleaning/Property Maintenance • Finishing 	<ul style="list-style-type: none"> • Cutting 	<ul style="list-style-type: none"> • Chemicals • Metal working 	<ul style="list-style-type: none"> • Automotive industry • Iron and steel • Sawmills 	<ul style="list-style-type: none"> • Quarrying • Pottery/ceramics • Pharmaceutical 	<ul style="list-style-type: none"> • Asbestos • Cement dust

* WEL: Workplace Exposure Limit

This industry guide is not exhaustive but offers some typical industries for which 3M™ Aura™ 9300+ Series Respirators may be suitable. All the 3M™ Aura™ 9300+ Series respirators offer respiratory protection against solid and non-volatile liquid particulates when used and worn correctly – the required protection level will depend on the concentration of contaminants in the environment, exposure limits and other risk factors.

Warning: Selection of the most appropriate respiratory protective equipment (RPE) will depend on the particular situation and should be made only by a competent person knowledgeable of the actual working conditions and the limitations of RPE.

The 3M™ Aura™ 9300+ Series Features and Benefits Guide

Product Details	Features	Benefits
<p>+1 NEW Low breathing resistance filter technology</p> <p>3M™ Cool Flow™ Valve (3M™ Aura™ 9312+, 9322+ & 9332+ Disposable Respirators)</p>	<ul style="list-style-type: none"> • Innovative technology • Effective removal of heat build up 	<ul style="list-style-type: none"> • Enables high filtering performance with less effort on the part of the wearer • Provides a cooler and more comfortable wear • Removes exhaled air • Helps reduce the fogging of eyewear
<p>+2 NEW Embossed top panel</p>	<ul style="list-style-type: none"> • Minimises the flow of warm, moist exhaled air through the top panel 	<ul style="list-style-type: none"> • Helps reduce the fogging of eyewear
